Freshness in Season. Precision in Motion.

From harvest and packing in Chile to their journey across the ocean, every stage matters when transporting cherries.

MADE WITH AI

Connecting the cherry season with key markets

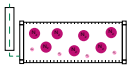

As the world anticipates the delectable taste of Chilean cherries, Ocean Network Express (ONE) is pleased to share that our ONE Cherry Express Connection Asia Latin America Express 1 (AX1) service will offer improved transit time from Valparaiso to Hong Kong, tailored to the special care required to transport this precious commodity.

Key benefits of ONE Cherry Express Connection

Fast and dependable transit from Valparaiso to Hong Kong

Optimized port rotations and faster sailing speeds to expedite delivery, effectively managing the short shelf life of Chilean cherries.

Specialized care with COOLXTEND CA+

The most technologically advanced controlled atmosphere system in the market aimed at prolonging shelf life and safeguarding freshness, tailored to maintain the delicate nature of Chilean cherries.

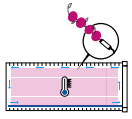

Track effortlessly with CONTAINER+

Cutting-edge reefer monitoring system solution provides near real-time monitoring and key data to empower you and your business.

Experienced reefer team

Well-suited to provide customized reefer solutions to transport your precious cargo and 24/7 technical assistance for onboard reefer shipments.

Post-harvest sterilization with COOLTemp solution

Best-in-class cold treatment (CT) ensures stringent protocol compliance across diverse markets through precise control and continuous pulp temperature recording.

Greater visibility along the way with CONTAINER+

Enhanced visibility of refrigerated cargo throughout its journey, providing access to key reefer and shipment data with CONTAINER+.

CONTAINER+ is ONE's digital reefer monitoring solution, providing near real-time* condition data through a single dashboard. It gives customers greater visibility into their temperature-sensitive cargo and supports more informed decision-making throughout the shipment journey.

Visibility throughout the journey

- **Location tracking at sea and on land**
- **Supply/return air monitoring**
- **Ambient temperature and humidity**
- **Reefer's active power status**
- **Controlled atmosphere & USDA advanced probes**

Turning visibility into action

Identify deviations earlier
Greater visibility helps customers identify potential issues and minimize the impact of temperature excursions.

Make informed decisions
Use shipment condition data to support operational decisions and future planning.

Review shipment performance
Shipment and monitoring data remains accessible for post-shipment review.

*Near real-time monitoring is dependent on cellular connectivity. Data transmission may be intermittent during portions of the voyage and resumes when connectivity is restored.

Unbox possibilities this cherry season

From Chile to key markets across Asia, the transportation of cherries requires careful coordination and specialized reefer capabilities.

Through ONE Cherry Express Connection, we bring together dedicated seasonal connectivity, Cold Treatment and CONTAINER+ to support customers throughout the Chilean cherry season.
